Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Species A (embodiments of figs. 1-5, 15 and 24) in which the collector electrodes are not embedded and
- Species B (embodiments of figs. 6-14, 16-23 and 25-26) in which the collector electrodes are embedded.

Upon election of Species B, Applicant needs to further elect one species from

B₁₁-B₁₃:

- Species B₁₁ (embodiments of figs. 9-10);
- Species B₁₂ (embodiments of figs. 11-12); and
- Species B₁₃ (embodiments of figs. 13-14).

Upon election of Species B and one species from B₁₁-B₁₃, Applicant needs to further elect one species from B₂₁-B₂₄:

- Species B₂₁ (embodiments of figs. 16-17);
- Species B₂₂ (embodiments of figs. 18-19);
- Species B₂₃ (embodiments of figs. 20-21); and
- Species B₂₃ (embodiments of figs. 22-23).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

In Species A (embodiments of figs. 1-5, 15 and 24) the collector electrodes are not embedded, whereas in Species B (embodiments of figs. 6-14, 16-23 and 25-26) the collector electrodes are embedded.

The following claim(s) are generic: claims 1 and 3.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the common technical features between the species are the structural limitations of groups 1 and 3. This elements cannot be a special technical feature under PCT rule 13.2 because the element is shown in the prior art. Muramatsu et al. (JP 2002-008740A) in view of Murakami et al. (JP 2002-094096A) teaches the common technical features.

4. Due to the complexity of the restriction requirement, a telephone was not made to request oral election to above restriction requirement. See MPEP §812.01.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
